

## Washington State Immunization Information System Quick Reference www.waiis.wa.gov

#### **Inventory Report Guide - Changes to the Inventory Reconciliation Feature**

These instructions give guidance on the recent changes to the reconciliation feature within the Washington State Immunization Information System (IIS) for providers who currently manage their vaccine inventory in the system. The current enhancements are aligned with our ultimate goal of online inventory reporting.

Changes to the *Reconciliation* page as of 5/17/2013 require new steps to manage inventory within the IIS. Because of these changes the monthly **Lot Number Summary** report must be run one or two ways to ensure accuracy of the data. Note: The date ranges are tied to the expiration dates causing more lots to be reported; we are addressing this issue. Your Local Health Department decides whether to accept these reports from the IIS as they are now much larger.

1) Run a Lot number summary report to include the following variables:

Include Order/Transfer Quantities- check box

Report Date- report date range as assigned by your Local Health

Department

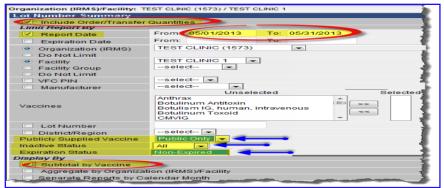

**Publicly Supplied Vaccine**- Public Only

**Inactive Status-** All

**Expiration Status**- Non- Expired (default value)

Subtotal by Vaccine- check box

This report shows all non-expired lot numbers. This report will be quite long if you've managed your inventory in the system because it returns results for all non-expired, active or inactive lots in your inventory regardless if they were used/adjusted at the time of report.

2) Run a Lot number summary to include the following variables:

Include Order/Transfer Quantities- check box

**Report Date**- report date range as assigned by your Local Health Department

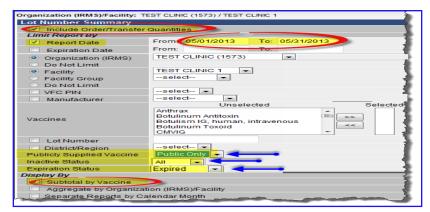

**Publicly Supplied Vaccine**- Public Only

**Inactive Status-** Inactive

**Expiration Status**- Expired

Subtotal by Vaccine- check box

Only run this report if you inactivated a lot number that expired during your selected report period. This report shows all lot numbers that have been inactivated and expired within that date range.

Need help with inventory management or have questions about the WA Childhood Vaccine Program? Contact your Local Health Jurisdiction or the State at 1-866-397-0337 email: wachildhoodvaccine@doh.wa.gov. Need technical assistance? Contact the Help Desk: 800-325-5599 or 206-205-4141 email: iishelpdesk@kingcounty.gov. If you have a disability and need this document in another format, please call 1-800-525-0127 (TDD/TTY 711). DOH 348-396, May 2013, Updated for IIS Version 5.13.2.3

# Washington State Immunization Information System Quick Reference www.waiis.wa.gov

### Inventory Report Guide - Changes to the Inventory Reconciliation Feature How these reports work together:

The total **Doses Used** cell for each vaccine type on the *Lot Number Summary report*(s) should equal the **Doses Administered** total from the *Washington State Vaccine Administered Report*.

#### Example:

1) Washington State Vaccine Administered Report:

Date Range: 05/01/13 - 05/31/13

DTaP = 15 IPV = 7 MMR = 10

2) Lot Number Summary Report #1 – (Inactive Status = All; Expired Status = Non-expired)

Date Range: 05/01/13 - 05/31/13

DTaP = 15 IPV = 7 MMR = 10

The aggregate totals for each vaccine type from the *Washington State Vaccine Administered Report* should equal the total **Doses Used** from the *Lot Number Summary Report*. Only run the second report if you are aware that vaccines expired and were inactivated during your reporting period.
